**WE PURSUE AN
ENVIRONMENTALLY FRIENDLY
PRODUCTION STRATEGY.**

**MODERN PRODUCTS IN
HIGH QUALITY.**

LENI home design

In 1961, our family business started manufacturing plastic injection molded parts. For decades we have been using recycled and also recyclable material. Our core competence regarding plants is our hydroculture system for long-term irrigation. Therefore, these products follow a proven hydroculture standard. In addition, our range also offers individual planters and care accessories for plants in soil. Thus, we deal complementary with exclusive, classic and seasonal cachepots made of ceramic.

Whether you care for a small or large plant, at LENI you will find planters and care accessories in many suitable sizes.

LARGE PLANTERS

The proven LENI Sauerland series is particularly suitable for classically presenting plants in LENI hydroculture pots of standard height 19 cm. The stackability of the planters also allows for fancy arrangements. The large pots can also be equipped with castors underneath. The planter can be used indoors and can be enabled for outdoor use by drilling a drainage hole. The option of lacquering in the proven RAL colors favors standardized color combinations. For individual wishes, LENI also offers lacquering in structure, gloss, metallic and hammered finishes.

LARGE PLANTERS

ELEGANCE

The popular LENI Elegance series contains visually timeless planters with universal fit. The large planters can also be fitted with castors underneath, which remain visually concealed from the outside due to the special design. The planter can be used indoors and can be enabled for outdoor use by drilling a drainage hole. The option of lacquering in the proven RAL color shades favors standardized color combinations. For individual wishes, LENI also offers lacquering in structure, gloss, metallic and hammered finishes.
